Least Bell’s Vireo

Least Bell’s Vireo is an endangered species that occurs locally at Hansen Dam, the San Gabriel River, Santa Fe Dam, Whittier Narrows, the Sepulveda Basin, the Ballona wetlands and creek, and at Hahamongna Watershed Park where two were discovered in 2012 by local birder David Bell.

Least Bell’s Vireos nest in riparian habitat on the coastal slope and in areas of mesquite at desert sites. A small, drab, grayish-yellow insectivore, the species is easy to overlook, but they are much easier to locate by their distinctive, loud, and persistent songs. Least Bell’s Vireo is a neotropical migrant, and its winter range and habitat are not well understood.

The population of Least Bell’s Vireos plummeted precipitously throughout California in the 20th century due to habitat destruction and brood parasitism by Brown-headed Cowbirds. The number bottomed out at roughly 300 pairs in the mid 1980s, and the species was added to the California and federal endangered species lists in 1984 and 1986. Since listing, habitat destruction has slowed considerably and, coupled with aggressive cowbird trapping, local populations have begun to rebound. Even so, a bird that was once common from northern Baja California north throughout the Central Valley is now restricted to small pockets of suitable habitat south of Santa Barbara County where its future is still at risk.

The discovery of Least Bell’s Vireos at Hahamongna Park could help alter Los Angeles County’s plans for removing the willow/mulefat habitat at Hahamongna. Be sure to report any Hahamongna sightings to eBird and to the Pasadena Audubon Yahoo group or Facebook group. Also look for this species on our upcoming field trips to Encanto Park and Big Morongo.

Lance Benner

President’s Perch

Spring has sprung, as evidenced by birds flying past with twigs, paper, and string — heading to undisclosed locations in a tree near you. I always marvel at the tireless energy of the birds this time of year. My hope is that the Western Screech-owl will nest again on my street, providing a bit of diversion when I walk my dog each evening.

Get ready for Birdathon! We have a few teams forming now. Depending on your birding style you can get up at midnight and go all day with Irritable Owl Syndrome, travel L.A. using various modes of transportation with the Locavores, or enjoy a slow-paced day with folks on the Big Sit. This year, funds raised will go to the Western Field Ornithologists to bolster the Pasadena Audubon Youth Scholarship Fund, which honors the memory of Mike San Miguel.

We have a busy season ahead with Birdathon, S.M.O.R.E.S (April and May), and our participation in Earth Fest on May 4th at the Los Angeles River Center. Please put these events on your calendar and plan to step up and participate!

Happy Birding,

Dent Sinnott
April Program
Friends of Seal Beach National Wildlife Refuge
Wednesday, April 16, 2014
7:30 pm—9:00 pm
John Fitch
The Seal Beach National Wildlife Refuge is part of the extensive San Diego National Wildlife Refuge Complex and is located within the Seal Beach Naval Weapons Station. The Refuge's tidal salt marsh, 965 acres, serves as a sanctuary for resident wildlife, as well as providing a critical migration stopover and wintering habitat for thousands of birds that migrate up and down the Pacific flyway each year.
Join us as John Fitch, bird specialist with Friends of Seal Beach National Wildlife Refuge, presents a program focusing on the formation of the refuge, the creatures that live there and what the Friends do to improve the habitat.

May Program
Remarkable Red Crossbills
Wednesday, May 21, 2014
7:30 pm – 9:00 pm
Lance Benner
Red Crossbills are finches with beaks that cross at the tips. In North America they have recently been classified into ten types based on their flight calls and may actually represent a number of different species.
This talk will discuss the biology and adaptations of Red Crossbills, make extensive use of eBird maps to illustrate their geographic distribution, and use recordings and sonograms to demonstrate how to identify their flight calls.
In the past three years Lance Benner has worked with Walter Szeliga, Kathi Ellsworth, and John Garrett, using sonograms to determine the flight call types. This led to the discovery that the Red Crossbills that occur most often in southern California are type 2s and that many of the crossbills in our area during the irruption of 2012-2013 were type 3s.

June Dinner
Annual Dinner
Saturday, June 14, 2014
6:00 pm—9:00 pm
Eaton Canyon Nature Center
Enjoy good catered food and drink, interesting and amiable dining companions, and blessedly short speeches at Pasadena Audubon's yearly dinner. Meet the newly elected officers for 2014-2015. Vie for raffle prizes. Play Spotted Owl calls faintly and surreptitiously on your smartphone, and watch the reaction.
Tickets are $20 per person. Make checks payable to "Pasadena Audubon Society" and make a note of "annual dinner" on the check. Send to the PAS address shown on page 8.
Questions? Contact Hospitality Chair Chrystal Watson at (626) 794-9233.

General meetings are held at Eaton Canyon Nature Center (address on back cover). Refreshments and socializing begin at 7:00 pm and programs are presented from 7:30 pm to 9:00 pm.

Conservation
Pasadena’s Next Environmental Dilemma—The 710 Tunnel
Get ready for the release of the Draft Environmental Impact Report on the 710 Tunnel. Cal Trans will be releasing this document soon, probably in May. We will need to pay close attention to this document, as this project, which aims to close the gap between the 10 and the 210, has serious ramifications for all of us. The air quality will be severely affected, and the amount of soil that will be removed is five million cubic yards, more than the highest amount projected by the Department of Public Works in the Hahamonga Sediment Removal Project. Some of us remember what the 210 was like before we could take it all the way to the 15. It used to be a freeway we could use to get from point A to point B quickly. Now, it is one of the most congested freeways in Southern California. What will happen to traffic once trucks can travel straight from the ports of Los Angeles and Long Beach all the way to the Grapevine and the 5, using the 210?

As someone who commutes to East LA, I understand the desire to close the gap between the 10 and the 210. But we must pay attention to this project and make sure that the benefits outweigh the costs.

Nesting Season
You may have noticed birds carrying nesting material or building nests. Soon they’ll be feeding their young. This is why it is critical that we postpone any tree or shrub trimming until the fall. Not only is it better for the birds, but complies with federal law, which protects nesting birds. So please spread the word—save tree-trimming until the fall. The birds will thank you.

Laura Garrett

Local Boy Makes Good
John Garrett, the young man who became a first-rate birder while growing up in Pasadena, has distinguished himself by joining the California Bird Records committee while still a college student. CBRC is a committee of the Western Field Ornithologists and is the arbiter of rare bird sightings in California, and its members are acknowledged as some of the premier birders in the state.
CBRC recently made their masterwork, Rare Birds of California, available online. This was made possible by a publications fund set up in memory of deceased PAS member and CBRC member Mike San Miguel, who believed strongly in publishing this book both in print and online. To view this impressive publication, go to www.californiabirds.org.

Laura Garrett
Quail Lake
February 21, 2014

Thirty-one eager birders joined us at Quail Lake and, as usual, this location did not disappoint. This is the best place in L.A. County to get close comparisons between Greater and Lesser Scaup, and to see large numbers of Common Goldeneye. We also found other ducks that can be difficult to locate elsewhere, such as Redhead and Common Mergansers. Quail Lake is also a good raptor location; we saw both Bald and Golden Eagles, and watched a Prairie Falcon zip by.

But it got even better. At Quail Lake we found 3 Barrow’s Goldeneye: an adult male, a female, and an immature male. Even a single Barrow’s Goldeneye is seldom seen in L.A. County. We had great scope views of all three. These were life birds for many people on the trip.

After Quail Lake, we headed east across the Antelope Valley, and stopped for Ferruginous Hawks, Mountain Bluebirds, Bell’s Sparrows (formerly known as Sage Sparrow), and Vesper Sparrows.

We ended at Piute Ponds. There two LeConte’s Thrashers perched up in view for a very un-Lecontish long time, even allowing some photos. Raptors included Merlin, Prairie Falcon, and Ferruginous Hawk. We found a Marbled Godwit and a Semipalmed Plover, both unusual at Piute Ponds in winter. But the most unusual bird at Piute Ponds was a Pectoral Sandpiper. This is a rare bird in winter anywhere in our area; Pectorals are most often seen during fall migration.

Great Backyard Bird Count
February 14, 2014

Pasadena Audubon members joined about 100 third graders (yes, that’s 1-0-0) from Longfellow Elementary School as they participated in their second annual Great Backyard Bird Count (GBBC).

To help the third graders get ready for the GBBC, PAS and ECNCA members held three one-hour-long workshops to each of the three third-grade classrooms on February 12th. Our goal was to convey the basics of birds through bird taxidermy and fun, hands-on demonstrations. Dessi Sieburth, special PAS guest, shared some of his experiences with PAS including how fun it is to go birding, things he does to help birds, and his bird sketches and photography; and told the students about his amazing scientific work on the Bluebird Conservation project.

On the day of the GBBC, it was unusually warm, but we were ready. About 15 adults and 1 young birder, Dessi, cumulatively represented PAS, Eaton Canyon Nature Center Associates, the local community, parent volunteers, and teachers. The volunteers broke into teams and birded with 1 classroom at a time around the school yard. Despite the fact that we birded on Valentine’s Day, we weren’t able to find any Lovebirds. By the end of the morning we found a grand total of 35 species, including Hermit Thrush, Anna’s and Allen’s Hummingbirds, Western Scrub-Jay, Yellow-rumped Warbler and Band-tailed Pigeon.

GBBC tidbit: In 2013 birders from all 7 continents, including more than 100 countries, counted birds. During the 2013 count more than 34.5 million birds were counted and a total of 3,610 species were recorded. That’s nearly one-third of all the species in the world.

Susan Gilliland

Parrot Chase
February 15, 2014

Pasadena Audubon’s annual parrot chase turned into a parrot stroll, but it was a near thing.

Several dusk and pre-dawn trips to the traditional parrot/parakeet roosts in Temple City and nearby neighborhoods turned up no roosts and just a few sightings of birds commuting to other locations, mostly northwest.

Fortunately, birder Kevin Gin had on November 25th reported a major afternoon aggregation of parrots staking along Raymond Ave. in the vicinity of Hammond St. in northwest Pasadena. On a subsequent day I followed the flock to a roost site along Claremont Ave. straddling both sides of Fair Oaks Ave. Even more fortunately, these birds were still present on chase day. The group saw single-digit numbers of Yellow-headed, Lilac-crowned, and Red-lored Parrots, an estimated 500 Red-crowned Parrots, and an estimated 500 additional Amazona parrots not identified as to species.

We saw none of the Mitred or Red-masked Parakeets that typically joined the roost in Temple City. The traditional South Pasadena roost of Mitered Parakeets has moved from Ramona St. to the quadrant northeast of Huntington Dr. and Fremont Ave. If anyone knows where the Temple City flocks of Aratinga parakeets are roosting, please let me know (contact details are in the “trip leader information” section on the calendar page.

Oh, yes. The tour participants who came the farthest were from Ohio and Indiana. The one who traveled least was passing by on his way to the hardware store, and happened to have his scope with him. Everyone seemed to enjoy it.

Larry Allen
Tejon Ranch
Saturday, April 12, 2013
Early morning — Midafternoon

The Tejon Ranch is 422 contiguous square miles and is the largest piece of privately held property in California. The Ranch came to an agreement with major environmental organizations (including the National Audubon Society) regarding conservation and development. You can visit www.TejonRanch.com for more information. Part of that agreement was to expand its access to natural areas.

Last year we had Scott’s Oriole, Burrowing Owl, many raptors, many sparrows, and incredible scenery!

The Ranch is private property and is only open for visits by reservation. If you would like to visit the Ranch on this trip, please contact the trip leader (email preferred) with the following information for each person: Name, address, telephone number, and email address. I will then send further information on meeting place, time, etc.

Trip size is limited and is open to Pasadena Audubon members only. Hope to see you at the Ranch!

Ron Cyger

Big Santa Anita Canyon
Saturday, April 19, 2014
6:30 am — noon

Santa Anita Canyon is one of our most gorgeous local canyons. We’re going to explore it at a time of year when the spring migrants have arrived and many of the birds are most active. This is a particularly good trip for American Dippers and we’ll make a special effort to find them.

We’re going to hike down into the canyon to Fern Lodge Junction, along the trail above Sturtevant Falls, through the slot canyon, back south along the Stock Trail, down into the main canyon again, and then back up to the parking lot for a total of about six miles.

Meet at at Chantry Flat at 6:30 AM. We’re starting early to beat the heat and to avoid the crowds. Parking can be limited, so please carpool. Bring water, food, sunscreen, sturdy shoes, a hat, bug repellant, and an Adventure Pass. We’ll return to Chantry Flat by about noon.

Lance Benner

Piute Ponds
Saturday, May 3, 2014
6:30 am — 1:00 pm

During migration, the bodies of water and surrounding vegetation in the Antelope Valley attract a variety of birds taking a rest and refueling break during their journey. On May 3, Pasadena Audubon will search several of these key “oases” for northbound migrants. The trip starts at Piute Ponds, accessed with special permission from Edwards Air Force Base, therefore the number of participants will be limited. After Piute, we will visit Apollo Park and, time permitting, the (in)famous Lancaster Sewage Ponds. Birds sought include shorebirds, flycatchers, warblers, some of the resident A.V. specialties, and (with some luck) Bank Swallows, Black Terns, and Franklin’s Gulls. To take advantage of the day’s prime bird activity, trip participants should plan to meet at 6:30 (half an hour after sunrise) at a location to be specified in the Antelope Valley. We will aim to conclude the tour of the primary sites by 1:00 pm. Spotting scopes are recommended. This trip is open to 12 participants in addition to the trip leaders, with preference to those who did not go on this field trip last year, by order of sign-up. Contact me at dowell.darren@yahoo.com to sign up or for further information.

Darren Dowell, Mark and Janet Scheel

Big Morongo Preserve  
Saturday, May 17, 2014  
8:00 am—1:00 pm

This desert oasis and migrant trap offers great birthing in the spring. Warblers, flycatchers, hummingbirds, and orioles are among the birds expected. At least one pair of Vermilion Flycatcher has been seen every spring in memory. Join us as we walk the trails in Big Morongo Canyon Preserve and into adjoining Covington Park, where you will enjoy one of the finest birding locations in Southern California, with over 250 species making stops at the preserve annually.

Directions: Allow 2 hours to drive from Pasadena. Take Interstate 10 east to route 62. Go north to the town of Morongo Valley and turn right on East Drive to the Big Morongo Preserve at 11055 East Drive. Meet at the information kiosk. Bring lunch, drinks, sunscreen, and a good broad-rimmed hat.

Kathi Ellsworth

Lesser Nighthawks & San Gabriel River  
Saturday, May 24, 2014  
6:30 pm—9:00 pm

This short trip is designed to search for Lesser Nighthawks, Barn and Great Horned Owls, Bell's Vireo, Yellow-breasted Chat, and other birds active late in the day and at dusk along the San Gabriel River in the spring. Lesser Nighthawks were formerly common on the coastal slope but are now confined to a small number of places where isolated pockets of suitable habitat remain. The San Gabriel River between Santa Fe Dam and Azusa Canyon is one of their local strongholds and one of the closest places to Pasadena to find this species reliably. We'll make a special effort to see and hear lesser nighthawks trilling as part of their courtship displays. Please bring binoculars, headlamps, water, and bug repellent.

Meet at Encanto Park in Duarte at 6:30 pm. We'll do an easy walk across the bridge and north for about 3/4 of a mile along the San Gabriel River bike path.

Lance Benner

C'est Chouette  
Owls in the San Gabriel Mountains  
Saturday, May 31, 2014  
7:00 pm—midnight

Join us as we search for owls and nightjars in the higher areas of the San Gabriel Mountains. We'll start shortly before sunset when we'll look for Northern Pygmy Owl and diurnal montane species, and then after dark we'll look for Flammulated Owl, Northern Saw-whet Owl, Spotted Owl, Western Screech Owl, Great Horned Owl, and Common Poorwill. This trip concentrates on high elevations primarily to find flammulated owls, which do not usually occur below about 6000 feet in the local mountains.

Limited to 10 people. Please email the leader to reserve a spot.

Lance Benner

Throop Peak  
Saturday, June 7, 2014  
7:30 am—1:00 pm

Join us as we explore one of the highest altitude trails in the San Gabriel Mountains during the peak time of year for montane birds. We'll hike at a leisurely pace to the summit of Throop Peak (elevation: about 9100 feet) as we search for Williamson's Sapsucker, Townsend's Solitaire, Clark's Nutracker, Dusky Flycatcher, White-headed Woodpecker, Green-tailed towhee, Red Crossbill, and other montane species.

Meet at Dawson Saddle at mile 69.6 on the Angeles Crest Highway, about 45 miles from I-210 in La Canada. Bring plenty of water, lunch, sunscreen, bug repellent, sturdy shoes, a coat, and an Adventure Pass. The hike is about five miles round-trip with possible snow patches; a few sections are steep, and all of it is at altitudes in excess of 7900 feet. Please carpool and plan for about 90 minutes to drive up from Pasadena.

Lance Benner

Mt. Pinos and Environs  
Saturday, June 21, 2014  
7:30 am—early afternoon

Mt. Pinos is one of the best places in Southern California to enjoy a wide variety of montane birds. We'll hear singing Yellow-rumped Warblers along with many other species of warblers, thrushes, raptors, woodpeckers, flycatchers and finches. We will visit Iris Meadows and other nearby areas.

We will meet at the city park in Frazier Park. Take the Golden State Freeway (I-5) north to the Frasier Park turnout and continue west for about 5 miles to the stop sign in Frazier Park. Take a left at the stop sign then a right into the park. Don't forget lunch, water, and sunblock.

Larry Johnson and Ron Cyger

Chilao Visitor Center  
Second Sunday of every month  
8:00 am—10:00 am

The Chilao Visitor Center walks will continue each month, weather and road conditions permitting. (If things look rainy, snowy or brush fire-y, check first.)

Chilao, 26.5 miles north of I-210 on State Hwy 2, is a good place to see woodpeckers and we often see four or more species on a walk. Mountain Quail are somewhat elusive but still seen or heard about half the time. You can also expect Purple Finches, Steller's Jays, Dark-eyed Juncos and several species of nuthatches and others totaling about 30 species during the 2-hour walk.

Hill Penfold

Elections

Nominations for PAS officers for the coming year will be accepted from the membership at the April 16 general meeting. Elections will be held during the May 21 general meeting. The slate of new officers will be introduced at the June annual dinner, and their one-year term begins June 1.
Birdathon

April 25-27, 2014

It's back! Pasadena Audubon's main fundraiser gets dozens of folks out in the field, first collecting pledges and then sighting all the species that they can to maximize the proceeds. You can pledge a fixed amount, or an amount per species sighted. This year the proceeds go to the Western Field Ornithologists, to the youth scholarship fund dedicated to the memory of Mike San Miguel, a well-loved PAS member who died doing field work in the San Gabriel Mountains almost five years ago. Scholarship funds help young aspiring ornithologists attend the camps and conferences presented by WFO.

For the past few years, Birdathon participants have aligned themselves with one of three teams, although you are also welcome to form another team or just go your own way. All three teams have committed to this year's effort, too.

Team Irritable Owl Syndrome is the military boot camp version of Birdathon. Departing at midnight on count day, they set a relentless pace across virtually all of Los Angeles County and cover about 400 miles before finishing after dark. This year their target is 200 species. Want to support them? Contact the leader, Mark Scheel (info on calendar page).

The Locavores (formerly the Green Team) are older, perhaps wiser, and definitely lazier this year. They will unashamedly use cars this time — yet they are keeping it local, and will be on bikes or in hiking boots much of a very long day. Can they hit 140 species? To join them, or pledge your support, contact team leader Darren Dowell (info on calendar page).

The Big Sit, that sedate activity situated on a lawn at Legg Lakes, is back this year, although team leader Laura Garrett is planning a radical change. At some point, participants will actually rise to their feet and stroll around the lake, rather than just sitting continuously. Laura hopes that this will raise the count from the 55 or so species that have been seen in past years. To contribute or to join, contact her (info on calendar page).

Don Rogers

Don Rogers passed away on February 5, 2014. Don served Pasadena Audubon for many years, and a succession of Wrennit editors, doing desktop publishing for the Wrennit newsletter and for the Birding Guide to the Pasadena Area. He also made major contributions in historical research for the PAS centennial celebration in 2004. His wife, Karen Rogers, served as president of PAS in the 90's.

Don did volunteer work for many other non-profit organizations, too. He was an ordained minister and a skilled professional photographer. He loved the Huntington Library and Gardens, particularly the cactus garden. PAS has made a donation to the Huntington in his memory.

Magpie Bird Study Group

The group meets the third Tuesday of each month. We bird 9:00 am to about 11:30 am, have a sack lunch, and have a short business meeting. All PAS members welcome!

Tuesday, April 15, 2014

DONATIONS TO PAS

These PAS members and friends have recently made donations to our chapter: Anna & Norm Arneheim, Frank Burrows, Denise Castillo, Betty Cole & Arthur Mack, Tilda & Terry DeWolfe, Lew Hastings, Stacey Masci, Diana Neder, Phil Richardson, Henry & Loretta Selinger, Madeline West. Thank you for your generosity!

Become a Chapter-only Member of PAS

Local chapters of the National Audubon Society, such as Pasadena Audubon, receive only a small share of NAS membership dues. In order to finance our programs and services, including publication of The Wrennit, PAS offers Chapter-only memberships.

When it's time to renew your National Audubon membership, we invite you to instead become a Chapter-only Member of the Pasadena Audubon Society, or make a donation to our Chapter to support our programs. Chapter-only dues are $20 per year or $15 for seniors and students, all of which remains with our local chapter to fund our programs. We thank you all for your support!

Chapter-only Membership Application

Name ........................................... Phone ......................
Address ..................................................
City .................. State .... ZIP ........
Email ..................................................

If this is a gift, please also provide donor's information below:

Name ........................................... Phone ......................
Address ..................................................

SMORES Volunteers Needed

SMORES is an overnight camping program designed to provide youth of Los Angeles County the opportunity to make personal connections to nature. The program is organized by the County of Los Angeles Department of Parks and Recreation and funded by the Habitat Conservation Fund. Pasadena Audubon members served as birding guides for the SMORES participants in 2013, and now the 2014 events are beginning.

On April 12 the young campers will spend the night at Kenneth Hahn State Recreation Area. On May 17 the program moves to Whittier Narrows Regional Recreation Area. We are once again looking for PAS members to help with the birding activities on those two weekends.

You don’t need to be an expert. Just get out there and communicate your pleasure at birding to your group. It’s very rewarding to see birding take hold with some of the kids, to see a new world open up to them.

For more information or to sign up for a volunteer walker leader slot, contact Helen Wong at Eaton Canyon Nature Center, (626) 398-5420.
